WORK EXPERIENCE

(Darellina.com) *Freelance Web Developer* — **New York, NY** *June 2022 – August 2022*

- Developed interactive features for the client using Liquid, the open source language template created by Shopify and navigated pre-existing template code to make changes at client request.
- Maximized productivity by effectively provided ongoing guidance & governance to project.
- Utilized and referred to JavaScript and Liquid documentation daily, in an effort to guarantee functionality and optimization without jeopardizing client design.

Queer Global *Front End Developer Volunteer* — **New York, NY** *November 2022 – Present*

- Organized and managed time flawlessly in order to meet deadlines given by team.
- Familiarized myself with pre-written JavaScript, TypeScript and Material UI to completely understand the current state of the website to ensure efficient collaboration with the UI team.
- Spearheaded meetings every other Tuesday to discuss updates, changes to UI, challenges (personal or business) with the intention to open up if necessary and reach out for help.
- Restructured the existing website into a more interactive and user-friendly experience.

Projects

React/JavaScript/Typescript/Redux/Material UI/MongoDB/Socket.IO

Countrygame.netlify.app (deployed)

- Connected front end Vite React app to a rest country API with 200 countries and utilized Redux Toolkit to query data. Once the JSON data was collected, it was processed to extract only the information needed for each test. This application features familiarity with RESTful APIs and proficiency with the server side framework, Node.

MERN Stack Todo Application

- Connected front end Vite React app to back end MondoDB using mongoose in order to send and manipulate data to and from the server using RTK queries and Redux to handle state. This application demonstrates knowledge and experience with relationship databases such as MongoDB and proficiency with modern JavaScript/TypeScript.

Socket.IO Chat Application

- Connected front end Vite React app to a local server that stores data using Express with Socket.IO to manage communication between users. This application features unlimited users, notifications based on different events and flawless UI styling with customizable avatars and rooms (fonts/colors) all through the use of Material UI.

LEADERSHIP/TEAMWORK EXPERIENCE

Impact Coaching Network — **New York, NY**

Elementary School Chess Teacher — *September 2021 – Present*

- Partnered with 100+ teachers and coaches in various schools to ensure nothing less than success when working towards the biggest project of all, educating youth.
- Spearheaded events for weekly meetups regarding chess gameplay, tactics, homework and presented statistics regarding student improvements or impairments to make changes where possible.
- Regularly consulted with teachers/faculty to address and attend to any and all concerns.

Best Buddies Pittsburgh — **Pittsburgh, PA**

Volunteer Council — *September 2019 – December 2019*

- Coordinated events with team leaders to ensure proper transportation and food distribution.
- Partnered with a buddy (individual with down syndrome) at various events and spontaneous activities to ensure inclusion and a life-long friendship.
